Subject: How can parties file comments on the proposed amendments to the state's CEQA guidelines?

Mr: Peterson:

Could your office please provide a link on your website that parties can use to file comments on the draft CEQA guidelines updates?

The website provides links to draft updates and notices of meetings, but provide no easy way for parties to file comments.

We certainly believe that the final CEQA Guidelines update language should require that project sponsors address potential impacts associated with global climate change.

We also believe that project sponsors should be required to address impacts associated with potential terrorist attacks on their project sites.

Please include these comments in your project comments, in case we are not able to file more complete comments before your August 27 deadline.

<http://ceres.ca.gov/ceqa/guidelines/>

Thank you.

Don Wood
